# 配置 Open CV&抓图

近段时间由于项目需要用到 0pencv3. 4. 5, 于是重新又配置相关环境,过程比较简单,只需要配置一次,以后不需要每次都要配置,直接添加使用,现将其总结如下:

#### 步骤:

- (1)、配置系统环境变量;
- (2)、VC++目录-->包含目录;
- (3)、VC++目录-->库目录;
- (4)、链接器-->输入-->附加依赖项;
- (5)、测试;

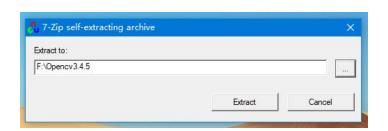

#### 1、准备工作

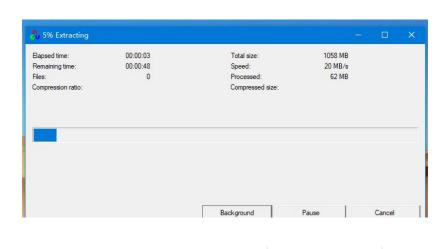

- (1)下载 Opencv3. 4. 5; 链接: https://opencv.org/releases.html
- (2)下载 VS2015; 链接: https://visualstudio.microsoft.com/zh-hans/downloads/

(3)、将 Opencv3. 4. 5 安装包解压到指定安装盘

opency

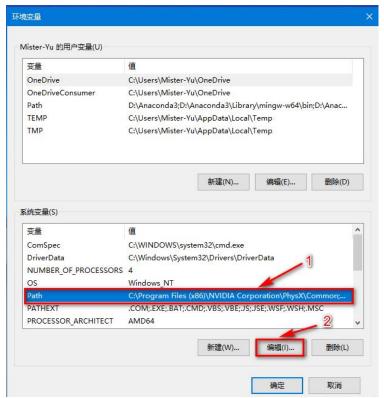

2019/1/24 12:22 文件夹

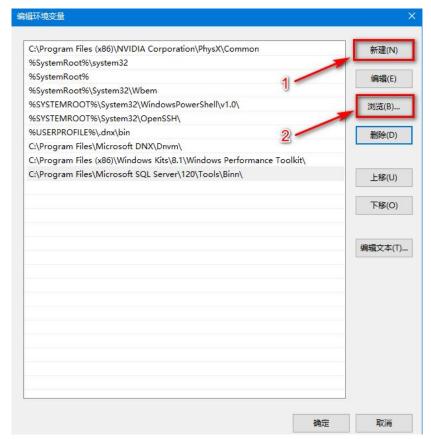

- 2、配置系统环境变量;
- (1)、找到计算机的系统属性-->高级-->环境变量;

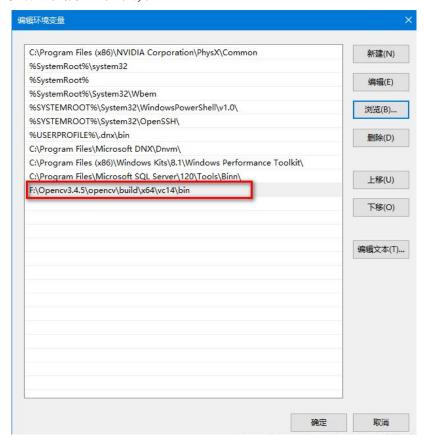

(2)、点击系统变量中的 Path-->编辑;

#### (3)、点击新建-->浏览添加路径;

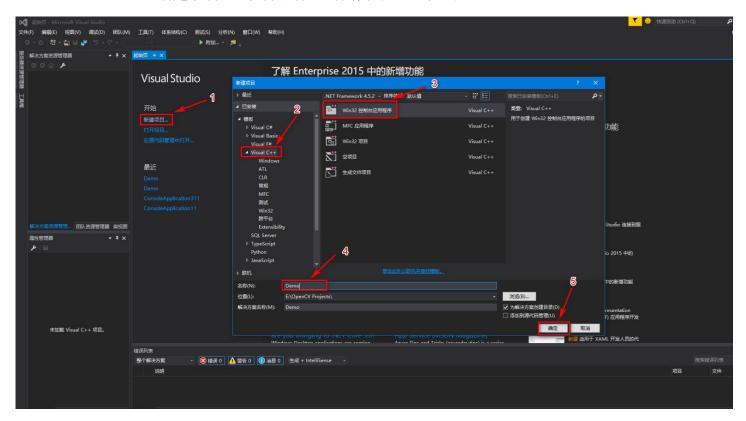

## (4)、添加完成的路径(如图);

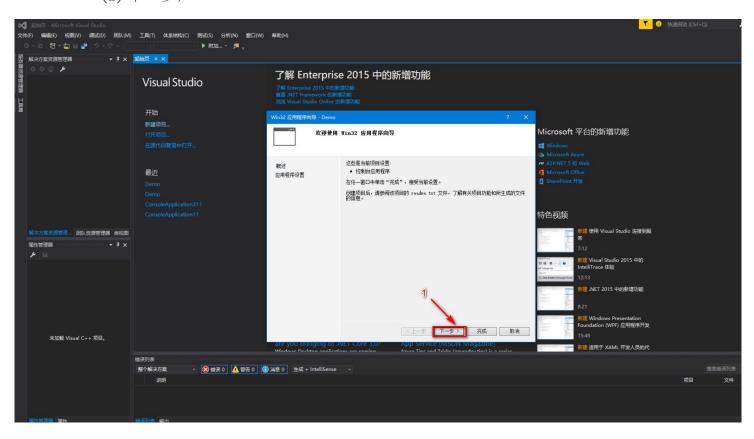

#### 2、VC++目录-->包含目录;

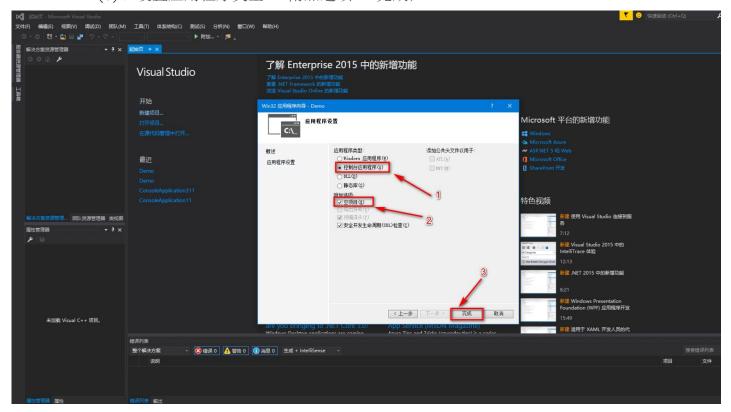

(1)、新建项目-->项目名称-->保存位置-->添加;

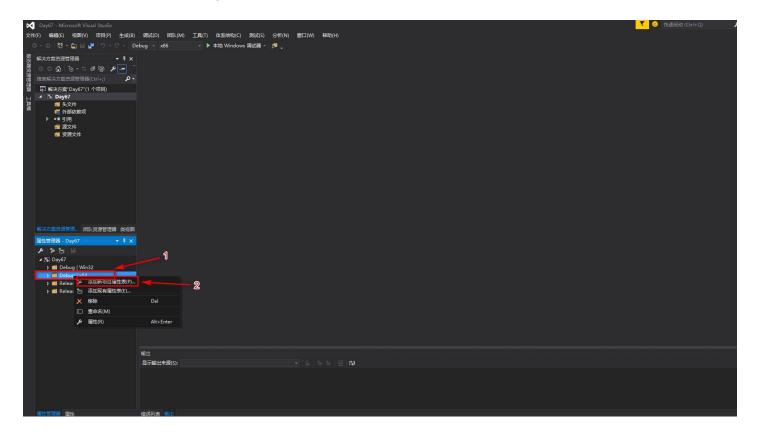

## (2) 下一步;

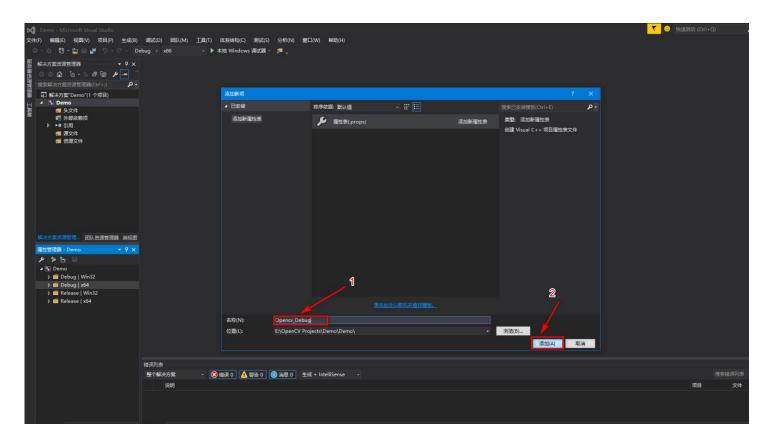

(3)、设置应用程序类型-->附加选项-->完成;

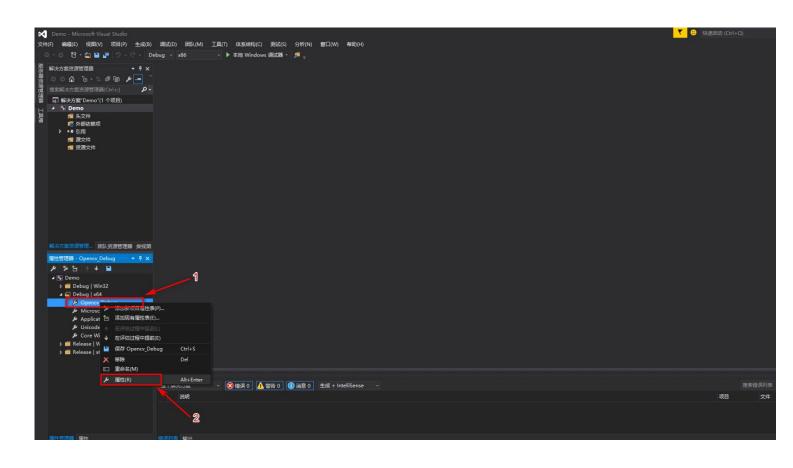

(4)、点击 Debugx64-->添加新项目属性表;

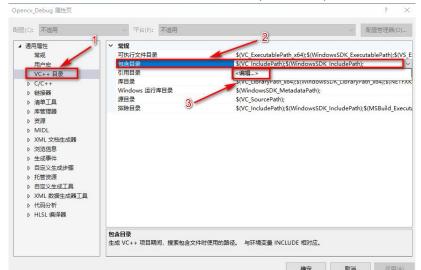

## (5)、设置属性表的名称-->添加;

(6)、右击 Opencv\_Debug-->属性;

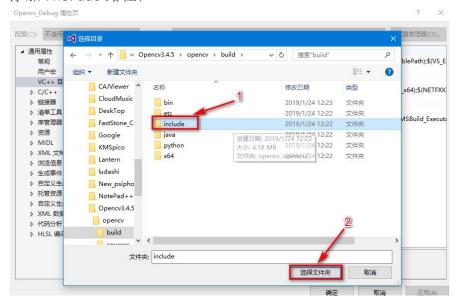

### (7)、添加 VC++目录中的包含目录(include\opencv2\opencv)

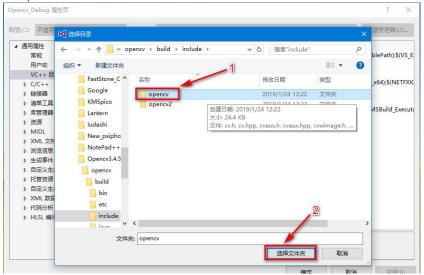

#### (8)、点击新建选项;

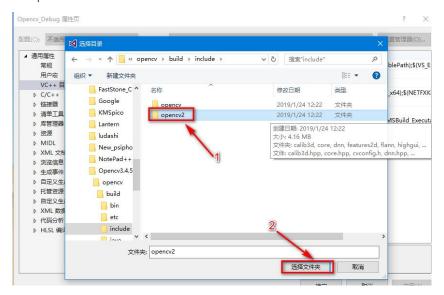

#### (9)、添加 include 路径;

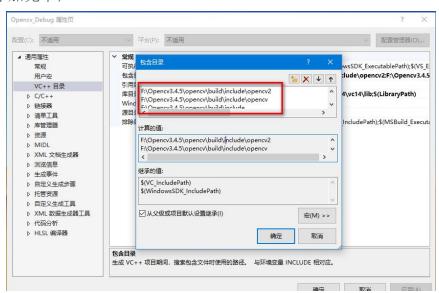

(10)、添加 opencv 路径;

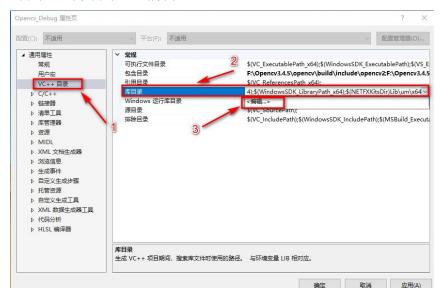

### (11)、添加 opencv2 路径;

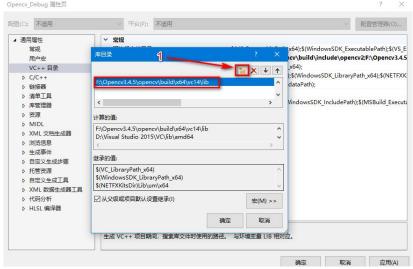

#### (12)、添加完毕;

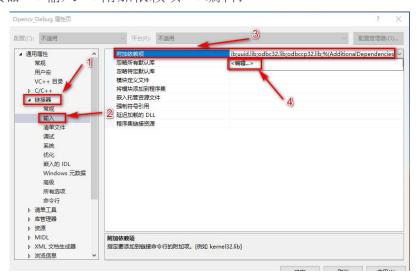

- 3、VC++目录-->库目录;
- (1)、VC++目录-->库目录-->编辑

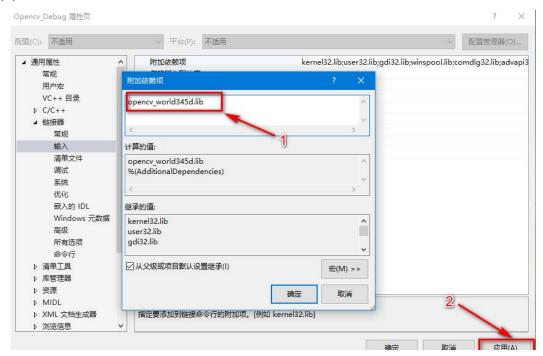

# (2)、点击新建选项;

- 4、链接器-->输入-->附加依赖项;
- (1)、链接器-->输入-->附加依赖项-->编辑;

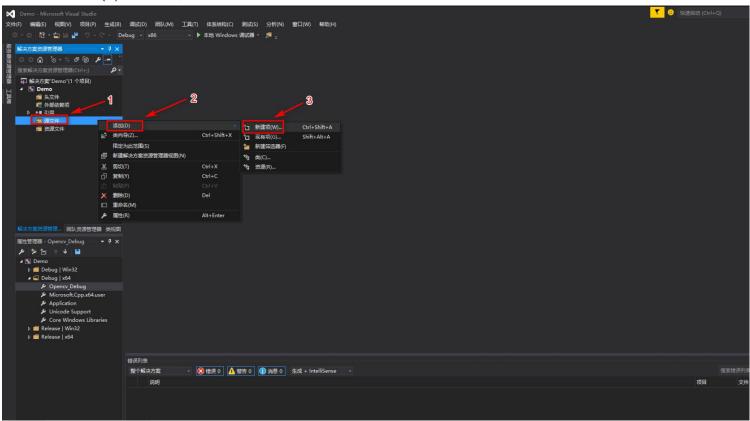

#### (2)添加完毕;

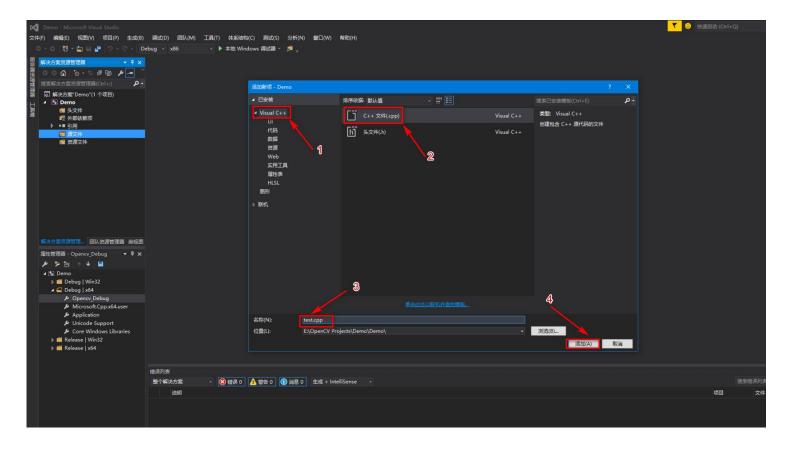

#### 5、测试;

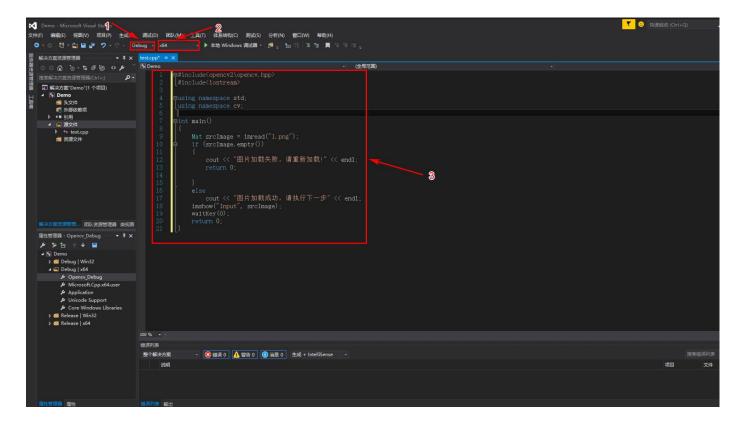

(1)、源文件-->添加-->新建项;

## (2) Vi sual C++-->C++文件-->项目名称;

(3)、Debug-->X64-->添加测试代码;

## (4)测试结果;

Tips: Release 版本的配置,步骤同 Debug 版本,只是在链接器-->输入-->编辑,添加附加依赖项改成: opencv\_worl d345. lib,即可。
